1. Use whole numbers and/or fractions to make up a number sentence that satisfies each condition below. (The parts are SEPARATE from each other.)

   (a) 15 is a divisor and 5 is a dividend.

   (b) $\frac{2}{3}$ is a minuend, and all three numbers are different.

   (c) 20 is a factor, and two of the three numbers are equal.

   (d) The addends have a product of 40.

   (e) The subtrahend is bigger than the difference.

2. Which role can the number 0 NOT take on in a division sentence? Why?
